About Us

Woodfrog Tech is an innovative AI and analytics firm specializing in next-generation data engineering and analytics solutions. We help businesses transition from chaotic, unstructured systems to streamlined, scalable, and insight-driven operations. Our mission is to simplify data, enable smarter decisions, and empower growth.

Our Vision

We aim to make data simple, accessible, and valuable for every business. Our goal is to help organizations use AI and analytics to make better decisions and drive real results.

Company Size

Founded in 2023 in Pune, India, Woodfrog is a growing team of 25+ experienced data scientists, engineers, and AI specialists. We serve clients across different industries.

How We Work

- **Collaborative:** We partner closely with clients to understand their needs and deliver practical solutions.
- **Agile:** Our team uses flexible methods to ensure quick delivery and continuous improvement.
- **Transparent:** We believe in open, honest communication and ethical business practices.
- **Customer-Focused:** We measure our success by our clients' results.

Quality Commitment

We follow a thorough process—from data preparation to ongoing support—to ensure our solutions are reliable, easy to use, and add long-term value to your business.

Our Approach

We are committed to making advanced analytics available to all organizations, helping them grow and succeed in a digital world.

Our Offerings

Core Services

- **Data Engineering:** Ingestion pipelines, transformation, data lake/lake house architecture.
- **Analytics & BI:** Dash boarding, reporting, business KPIs, trend tracking.
- **Machine Learning:** Model development, experimentation (MLflow), MLOps.
- **LLMs & Automation:** LLM-based workflow automation, custom agents.
- **Data Visualization:** Custom charting services tailored to specific business needs, enabling insightful and interactive visuals.

Products

- **Custom Reporting:** A flexible framework for building pixel-perfect, goal-oriented business reports.
- **TrendViewer:** A visual layer for intuitive time-series analysis and performance storytelling, tailored for non-technical users.
- **Antvia:** A plug-and-play analytics arm that enables businesses to kickstart their digital analytics journey rapidly—without the complexity of underlying technologies or concerns about scalability.
- **Text-to-SQL Assistant:** Allows business users to interact with data using natural language, eliminating the need to write complex SQL queries.

Custom Solutions

- **Digitization Services:** Helping businesses transition from manual or semi-automated workflows to digital-first operations.
- **Open Source Technology Benchmarking:** Evaluation and comparison of data-focused open-source tools for performance, scalability, and integration.

- **Product & Business Understanding for ML/LLM Integration:** Working closely with stakeholders to build strategic roadmaps for incorporating machine learning and language model capabilities into business processes.

Technology Stack

- **Ingestion:** Airbyte, Fivetran, Kafka
- **Storage:** Apache Iceberg, Delta Lake, ADLS, S3
- **Query Engine:** Trino, DuckDB, ClickHouse
- **BI Tools:** Apache Superset, Metabase, Power BI, Looker, Oracle Analytics, Custom Reporting Solutions
- **Automation & ML:** MLflow, LangChain, MindsDB
- **Infrastructure:** Kubernetes, Azure, GCP, AWS

Why Woodfrog?

- **Proven expertise in enterprise data systems** — delivering reliable solutions across finance, manufacturing, and public sector domains
- **Rapid implementation** — go live with analytics, AI, and reporting platforms in weeks, not months
- **Strategic, product-oriented approach** — we build solutions designed for long-term usability, governance, and self-service
- **Open-source driven** — deep experience with Airbyte, Trino, Iceberg, Superset, and more, ensuring flexibility and cost efficiency
- **Scalable architecture** — solutions are designed to handle increasing data volumes and evolving business needs
