Say hello

Foundation & Early Growth

Woodfrog Tech was founded in 2023 in Pune, India, by a team of passionate data engineers and AI specialists determined to simplify data for businesses. The company's early phase focused on hands-on data consulting, helping local organizations transition from chaotic, unstructured systems to streamlined, scalable, and insight-driven operations.

Woodfrog quickly built a reputation for practical, collaborative solutions and reliable delivery.

Team Expansion & Service Diversification

As demand for its expertise grew, Woodfrog expanded its team to over 20+ professionals, including data scientists, engineers, and AI experts. The company broadened its client base across industries such as manufacturing, retail, digital startups, and non-profits. During this period, Woodfrog diversified its offerings to include robust data engineering pipelines, analytics dashboards, and custom reporting frameworks. Agile project management and transparent communication became core company values, ensuring clients received both rapid delivery and dependable support.

Transition to Product Development

Building on two years of hands-on experience and deep expertise in data services, Woodfrog began developing in-house products designed to accelerate and enhance client solutions. Rather than shifting

away from services, the company leveraged its consulting insights to create tools that solve recurring customer challenges more efficiently.

These products such as

- **TrendViewer** for intuitive time-series analysis
- **Antvia** for rapid analytics adoption for organisation which does not has analytics arm
- **knowvia** where advanced tools & features like custom reporting, hawk eye on specific event or series of events, ML & LLM integrations such as Text-to-SQL Assistant for natural language data interaction—empower both technical and non-technical users, helping clients achieve faster and more impactful results while still benefiting from Woodfrog’s tailored service approach.

New Business Verticals: Building on Core Expertise

Woodfrog has expanded into new business verticals that directly leverage its core strengths in data engineering and analytics. The company now offers

- **Advanced data visualization services** — designing custom dashboards and interactive reports for impactful, user-friendly insights.
- **Benchmarking & Tech Upgradation** — benchmarking modern data technologies & LLM models and solutions, helping clients select the best tools for ingestion, storage, and analytics.

All grounded in the expertise that defines Woodfrog’s approach.

Vision for the Future

Looking ahead, Woodfrog is committed to expanding its suite of self-service analytics, automated reporting, and industry-specific solutions, with a focus on emerging sectors such as Supply chain, ESG, EdTech, and insurance.

The company continues to invest in research and development to democratize advanced analytics, making them accessible to organizations of all sizes. Through its unique blend of consulting expertise and product innovation.

Woodfrog empowers clients to progress from data chaos to intelligence-led growth, establishing itself as a trusted partner in the digital era.
